

# MEET THE TEACHER

Hello Families!

I'm excited to be your child's fourth grade teacher. This will be my fifth year at Burns Park Elementary School (go penguins!). We are going to have a fun year filled with new friendships, community building, and engaging projects.

In our classroom, the instructional material is differentiated to each child in both math and literacy. Students will take ownership of their learning by making many choices and setting personal goals. This year, your child will continue to develop important life skills including, but not limited to, becoming a life-long learner. We are lucky to have Ben Hill joining us as a student teacher this school year. Your child will bring home more information about what makes our classroom unique on the first day of school.

This summer I expanded my artistic skills by taking my very first pottery class through Ann Arbor Rec and Ed. Also, I spent a lot of time preparing for our upcoming move into our very first house. In addition, I enjoyed reading, exercising, playing games with my family, and walking my dog with my husband.

I hope to see you soon at the *popsicles in the park* event this Thursday, 3:00-4:00 pm.

Sincerely,  
Mrs. Crook :)
